

Khan Academy

Concept Note and Process

Dear Parents ,

Greetings !

This is inform you that we will be endorsing the program of Khan Academy for Math along with the regular curriculum content teaching to our students. This is totally free of cost for students.

Khan Academy is an American non-profit educational organization created in 2008 by Sal Khan. Its goal is creating a set of online tools that help educate students. The organization produces short lessons in the form of videos. Its website also includes supplementary practice exercises and materials for educators.

The objectives of this program are

- Make learning holistic .
- Teaching with different methodology to make learning interesting
- Revamping of important concepts for better learning
- The quizzes and unit tests help spot check the student's concept mastery.
- Offers opportunities for students to direct their own learning.
- This helps child learn at his own pace.

We are implementing it for classes VII,VIII and IX. Students will have these classes once in a fortnight.

Looking forward to your ward's active participation in this program

Regards,

Khan Academy Class Coordinator

Ms. Chetna Agarwal
